

Tina Turner

Building Data-Driven & AI-Enabled Organizations

Over the past 20 years, I have helped organisations accelerate growth, build digital businesses, establish data-driven decision making and execute complex transformation programmes. Today my focus is on helping organisations leverage technology, data and artificial intelligence to improve productivity, scalability and competitiveness.

I believe the next generation of successful companies will not be defined by the technologies they adopt, but by how effectively they integrate data, AI, processes and leadership into a coherent operating model.

AI Transformation

From use case identification to scaled production deployments with measurable business impact

Data-Driven Organisations

Building transparency, KPI systems and decision intelligence

Digital Operating Models

Redesigning processes, workflows and organisational structures for scale

Technology Strategy & Governance

Aligning technology investments with business outcomes

Portfolio Transformation

Supporting value creation across portfolio companies and growth-oriented organisations
